

**Project Name**

Mersey Police Operational Command Centre SPEKE

**Client**

Morgan Sindall

**Commenced**

June 2016

**Duration**

92 weeks

**The Project**

A new operational command centre for Merseyside police. The project is valued at £50m, the value of our contract works is £3m. The works comprise of a 3 storey PC concrete framed building as the operational centre, a single storey steel framed ancillary building to accommodate the "engine room" to run the complex, a dedicated dog kennel building and training ground, car parking for 1200 vehicles and a purpose-built security building at the site entrance.

**Scope**

The Scope of Works is broken down into the following sections:

- Drainage – including two underground attenuation tanks, two foul chamber pumping tanks.
- Foundations to the Ancillary building, Dog Kennels, Security building and Covered car park.
- Formation of all roadways in readiness for surfacing by a third party.
- Forming of security "bunds" to the site perimeter.
- Hard landscaping - comprising of "Marshalls" myriad paving blocks and key blocks.
- PAS 68 rated security bollards throughout.
- Service Ducting – 6km of underground service ducting throughout the complex.
